

The Public Site, Page by Page

A complete walkthrough of every visitor-facing screen of Yewogen Derash — layout, sections, components, colours, and the logo — prepared so you can evaluate the current look and mark exactly how you want it to appear.

The design system

Everything on the public site is built from one small, consistent kit. If you want to change the “feel”, these are the levers.

Brand logo

Yewogen Derash

A hand-holding-a-heart glyph in white, on a green rounded square, next to the wordmark. “Yewogen” is ink-black; “**Derash**” is brand green. Always links home. Used in the header, footer, and on the ID cards.

Colour

Primary green
#0F7A4D

Accent mint
#E6F2EC

Gold (trust)
#C8922A

Ink
#0B1620

Page bg
#F7FAF8

Card
#FFFFFF

Success
#16A34A

Danger
#DC2626

A full **dark mode** exists too (near-black backgrounds, brighter green [#22A56B](#)). The whole site is theme-aware.

Typography

ROLE	TYPEFACE	USAGE
Display / headings	Plus Jakarta Sans (700–800)	Page titles, campaign titles, section headers — tight tracking.
Body / UI	Inter (400–600)	Paragraphs, labels, buttons, navigation.
Mono / codes	Courier	Querycodes, verification codes, references.

Core components

Rounded cards with soft shadows, pill badges, a green progress bar, and a gold “Mulesoo verified” stamp are the repeating building blocks.

Header & footer (every page)

The same slim header and rich footer wrap every public page, so the frame feels consistent everywhere.

Header — sticky, translucent

- Left: **logo** (home). Center/right: `Campaigns`, `Support`.
- Signed-out visitors see only a quiet **Sign in** — there is deliberately *no* “become a fundraiser” button up here (kept calm and donor-first).
- Signed-in: name + a button to their `Dashboard` (or `Admin panel`), plus Sign out.

Footer — four columns + credit

- **Brand blurb** + three link groups: *Platform* (Browse, Blog, Support), *Legal* (Terms, Privacy, Fees & payouts), *Help* (FAQ, Contact).
- A single “**become a fundraiser**” call-to-action lives here (hidden on the homepage & registration).
- Bottom bar: © year + “Designed & built by **MuleSoo Digital Services**”.

Homepage · /

Deliberately **not** a marketing splash — it opens straight into live campaigns, then explains why the platform is trustworthy. No hero banner, no owner sign-up shouting.

Section 1 — “Active campaigns”

A heading + one-line reassurance, a [View all campaigns →](#) button, then a responsive grid of up to **9 campaign cards** (1 / 2 / 3 columns by screen size). Empty state: a friendly “check back soon” card.

Section 2 — “Built for trust, end to end”

On a tinted band: four icon cards — **Verified owners**, **One campaign**, **one code**, **Separated ledgers**, **Instant confirmation**. Purely informational, no CTA.

Tone: calm, credible, donor-first. The “sell” is trust, not hype.

Browse campaigns · /campaigns

The full catalogue with category filters and sorting, built from the same campaign card used on the homepage.

The campaign card (used everywhere)

- **16:9 hero image** (or a soft green placeholder), zooms slightly on hover.
- Overlays: **category** badge (top-left), **Mulesoo verified** gold stamp (top-right), “Fully funded” badge when complete.
- Body: title (2-line clamp), summary, **green progress bar**, raised / target in ETB, location.

Browse page layout

- Page title + count, a row of **category filter pills** and a **sort** control (newest / most funded / ending soon).
- Responsive grid of cards; clean empty/×no-results state.

Campaign detail & donate · /campaigns/[slug]

The page that turns a visitor into a donor: the story on the left, a sticky donation panel on the right.

Main column

- Hero image + title + category
- Progress: raised / target / % / donor count
- Full story (rich text)
- Owner trust block — name, **Mulesoo verified**, link to their public ID
- Campaign **Updates** feed

Donation panel

- Preset amounts + custom ETB entry
- Optional donor name / anonymous
- **Donate** → secure Chapa checkout
- Querycode shown for QR sharing

Quick-donate landing · /q/[queryCode]

The mobile-first page a **QR scan** opens: a compact, single-column card — logo, campaign title, progress, and a donate form. One code → one campaign, always.

Thank-you · /donate/thanks

Post-payment confirmation: success tick, amount, campaign, and a nudge to share or explore more causes.

Author profile, blog & support

The pages that build credibility and answer questions.

Public fundraiser profile · `/a/[authorCode]`

A shareable **verification page** for a fundraiser — the same corporate ID card the owner downloads, their verification code, Mulesoo seal, and their campaigns. This is what a donor lands on when they verify who they're giving to.

Blog · `/blog` & `/blog/[slug]`

- List of posts (cover image, title, excerpt, date).
- Article page with a clean reading column, cover, and body.

Support hub · `/support` (+ sub-pages)

PAGE	WHAT IT IS
<code>/support</code>	Help landing — links to everything below.
<code>/support/faq</code>	Common questions, grouped.
<code>/support/fees</code>	Fees & payouts explained (the 3% + how money moves).
<code>/support/contact</code>	Working contact form → lands in the admin Support inbox.
<code>/support/report</code>	Report a campaign / fraud.
<code>/support/terms</code> , <code>/support/privacy</code>	Legal pages.

Onboarding wizard & auth

How a new fundraiser is verified, and how people sign in. Public-facing, but gated and serious.

Get started / KYC wizard · /start → /start/...

1 · Terms 2 · Documents 3 · Verify (live face) 4 · Review

- Step-by-step, progress-tracked flow: accept terms & fees → upload ID + supporting docs → **live biometric selfie** (with a phone-capture handoff via QR) → review & submit.
- On submit the applicant becomes *Pending* and enters the admin KYC queue.
- **Mobile capture** · /capture/[token] — a phone-only page to take the live selfie, linked to the desktop session in real time.

Authentication

PAGE	PURPOSE
/login	Standard email + password sign-in (donors / owners).
/register	Create an account (name, email, phone, password + email OTP).
/fundraiser-login	Sign in with the printed fundraiser code + password (+ biometric where enrolled).

Auth pages are centered single cards on a soft background, logo at the top — calm and focused.

Responsive behaviour

AREA	LAPTOP	PHONE
Header nav	Inline links	Hamburger drawer
Campaign grid	3 columns	1 column, stacked
Campaign detail	Story + sticky donate side-by-side	Stacked; donate below story
Footer	4 columns	Stacked groups

Your direction — tell me how it should look

Mark up anything below; I'll rebuild the public appearance to match.

Overall vibe (calm/corporate ↔ bold/vibrant?)

Your notes...

Colours & logo (keep green + gold? new palette? logo tweaks?)

Your notes...

Homepage (add a hero? banner? featured section? keep campaigns-first?)

Your notes...

Campaign cards & detail (imagery, layout, what to emphasise)

Your notes...

Anything to add or remove
